## EXPERIENCE

**Attendance control for JAJ 2024**                                                    May. 2024
Service implemented for the Vicaria Lima

A web application was developed as a technological solution to manage attendance control and authorization status for each participant in the massive 'JAJ 2024' event of the Vicaria de Lima. The application encompasses the frontend, backend, and database, utilizing modern technologies to ensure efficiency and reliability. Additionally, it offers an intuitive interface that facilitates the administration and tracking of participants.

Front: NextJS,React, HTML, CSS, Javascript, Typescript and Tailwind.
Back: Express - NodeJS.
DB: MongoDB - Atlas.

**Full Stack Developer**                                                    Feb 2024 - Present.
Kiwilex
In my role as a Frontend Developer, I have utilized Angular, jQuery, HTML, CSS, Bootstrap, Chart.js, and Typescript to develop and maintain an educational application for school and university students. Working collaboratively with a team, I have been responsible for implementing new features and ensuring the application's quality and usability. My commitment to delivering high-quality solutions has been demonstrated throughout the project.

**Support  Frontend Developer**
Freelancer                                                    Dec 2023 - present..

During my experience as a freelance developer, I have worked on various projects using technologies such as Angular, NextJS (React), MongoDB, Django, and SQL. I have been responsible for designing, developing, and deploying web applications, ensuring their quality and performance. Additionally, I have demonstrated proactivity and enthusiasm in each project, meeting deadlines and exceeding client expectations. My technical skills and attention to detail have been supported by excellent references from the projects I've participated in.
